

California Regional Water Quality Control Board  
North Coast Region

CLEANUP AND ABATEMENT ORDER No. R1-2007-0105

FOR

STEVE WILLS TRUCKING

Humboldt County

The California Regional Water Quality Control Board, North Coast Region (hereinafter Regional Water Board), finds that:

1. On November 28, 2007 at around 2100 hours, a fuel truck owned and operated by Steve Wills Trucking, went off Pacific Lumber Camp Road and rolled over into Freshwater Creek, resulting in a discharge of an estimated 100 to 200 gallons of petroleum fluids into and adjacent to Freshwater Creek, tributary to Humboldt Bay.
2. Steve Wills Trucking is the owner of the fuel truck involved in the discharge. Steve Wills Trucking and is hereinafter referred to as the Discharger.
3. The existing beneficial uses of Freshwater Creek and Humboldt Bay, include:
  - a) Municipal And Domestic Supply
  - b) Agricultural Supply
  - c) Industrial Service Supply
  - d) Groundwater Recharge
  - e) Freshwater Replenishment
  - f) Navigation
  - g) Water Contact Recreation
  - h) Non-Contact Water Recreation
  - i) Commercial And Sport Fishing
  - j) Cold Freshwater Habitat
  - k) Wildlife Habitat
  - l) Rare, Threatened, And Endangered Species
  - m) Marine Habitat
  - n) Migration Of Aquatic Organisms
  - o) Spawning, Reproduction, And/Or Early Development Of Fish
  - p) Shell Fish Harvesting
  - q) Estuarine Habitat
  - r) Aquaculture
  - s) Native American Culture
4. The Discharger have caused or permitted, causes or permits, or threatens to cause or permit waste to be discharged where it is, or probably will be, discharged into waters of the State and creates, or threatens to create, a condition of pollution

or nuisance. The discharge and threatened discharge of contaminants has unreasonably affected water quality in that the discharge or threatened discharge is deleterious to the above described beneficial uses of State waters, and has impaired water quality to a degree which creates a threat to public health and public resources and therefore, constitutes a condition of pollution or nuisance. These conditions threaten to continue unless the discharge or threatened discharge is permanently cleaned up and abated.

5. The California Water Code, and regulations and policies developed thereunder, require cleanup and abatement of discharges, and threatened discharges of waste to the extent feasible. Cleanup to background levels is the presumptive standard. Alternative cleanup levels greater than background concentrations shall be permitted only if the Discharger demonstrate that: it is not feasible to attain background levels; the alternative cleanup levels are consistent with the maximum benefit to the people of the State; alternative cleanup levels will not unreasonably affect present and anticipated beneficial uses of such water; and they will not result in water quality less than prescribed in the Basin Plan and Policies adopted by the State and Regional Water Board. Any proposed alternative that will not achieve cleanup to background levels, must be supported with evidence that it is technologically or economically infeasible to achieve background levels, and that the pollutant will not pose a substantial present or potential hazard to human health or the environment for the duration of the exceedence of background levels (SWRCB Res. Nos. 68-16 and 92-49; California Code of Regulations, title 23, section 2550.4, subds. (c), and (d)).
6. Discharge prohibitions contained in the Basin Plan apply to this discharge. State Water Resources Control Board Resolution 68-16 (Non-Degradation Policy) applies to this discharge. State Water Resources Control Board Resolution 92-49 applies to this discharge and sets out the "Policies and Procedures for Investigation and Cleanup and Abatement of Discharges under section 13304 of the California Water Code."
7. Reasonable costs incurred by Regional Water Board staff in overseeing cleanup or abatement activities are reimbursable under Water Code section 13304(c)(1).
8. Any person affected by this action of the Board may petition the State Water Board to review the action in accordance with Water Code section 13320 and title 23, California Code of Regulations, section 2050. The petition must be received by the State Water Board within 30 days of the date of this Order. Copies of the law and regulations applicable to filing petitions will be provided upon request. In addition to filing a petition with the State Water Board, any person affected by this Order may request the Regional Water Board to reconsider this Order. To be timely, such request must be made within 30 days of the date of this Order. Note that even if reconsideration by the Regional Water Board is sought, filing a petition with the State Water Board within the 30-day period is necessary to preserve the petitioner's legal rights. If the Discharger choose to appeal the Order, the Discharger are advised that they must comply with the Order while the appeal is being considered. The appeals process is enclosed as Attachment 2.

9. The issuance of this cleanup and abatement order is an enforcement action being taken for the protection of the environment and, therefore, is exempt from the provisions of CEQA in accordance with sections 15308 and 15321, title 14 of the California Code of Regulations.
10. Failure to comply with the terms of this Order may result in enforcement under the Water Code. Any person failing to provide technical reports containing information required by this Order by the required date(s) or falsifying any information in the technical reports is, pursuant to Water Code section 13268, guilty of a misdemeanor and may be subject to administrative civil liabilities of up to one thousand dollars (\$1,000.00) for each day in which the violation occurs. Any person failing to cleanup or abate threatened or actual discharges as required by this Order is, pursuant to Water Code section 13350(e), subject to administrative civil liabilities of up to five thousand dollars (\$5,000.00) per day or ten dollars (\$10) per gallon of waste discharged.

THEREFORE, IT IS HEREBY ORDERED that, pursuant to California Water Code sections 13267(b) and 13304, the Discharger shall cleanup and abate the discharge and threatened discharges forthwith and shall comply with the following provisions of this Order:

1. Conduct all work under the direction of a California registered civil engineer or geologist experienced in surface water, soil, and groundwater assessment and remediation.
2. Coordinate assessment and cleanup activities associated with surface waters, soils, and groundwater with Regional Water Board staff, Humboldt County Environmental Health staff, the California Department of Fish and Game, and other regulatory agencies involved in the cleanup. All workplans and reports submitted to the Executive Officer of the Regional Water Board shall be signed and stamped by a licensed professional as specified in Task 1, above.
3. Comply with the provisions of Monitoring and Reporting Program No. R1-2007-0106.
4. Remove contaminated soil to the extent feasible. Contain, cleanup or remove contaminated waters to the extent feasible.
5. Conduct a sensitive receptor survey within 500 feet of the known extent of the discharge. The sensitive receptor survey must include, at a minimum, locations of water supply wells, preferential pathways, sensitive environmental habitats, and the identification of any potential health and safety issues.
6. If, for any reason, the Discharger is unable to perform any activity or submit any documentation in compliance with the directives contained in this order or submitted pursuant to this order and approved by the Executive Officer, the Discharger may request in writing, an extension of time as specified. The

extension request must be submitted five days in advance, if possible, of the due date and shall include justification for this delay including the good faith effort performed to achieve compliance with the due date. The extension request shall also include a proposed time schedule with new performance dates for the due date in question and all subsequent dates dependent on the extension. A written extension may be granted for good cause, in which case the order will be revised accordingly.

7. This Order in no way limits the authority of this Regional Water Board to institute additional enforcement actions or to require additional investigation and cleanup at the facility consistent with state and federal law. This Order may be revised by the Executive Officer as additional information becomes available.

Ordered by: \_\_\_\_\_  
Robert R. Klamt  
Interim Executive Officer
